

Celebrating
over
60 years
of service

Hundreds of types of fittings and clamps can be used with plastic and rubber tubing. Our goal at NewAge® Industries is to offer a good cross-section of fittings to efficiently connect our tubing and hose products. We suggest you use the Recommended Fittings & Clamps section found at each tubing and hose product to guide you in your selection.

You'll see on the following pages that NewAge Industries offers barbed fittings — Thermobarb® — in various plastic materials and in brass for use with soft-walled tubing. A wide range of standard sizes are available.

Heavy duty cam and groove couplings in two materials handle corrosive materials. They provide high impact strength and a much lighter weight than their metal counterparts.

NewAge also offers push-to-connect and PFA compression fittings. Contact your representative about these styles or your other fitting requirements.

To complete a tubing or hose installation, clamps are typically necessary. NewAge Industries offers a selection of quality products to securely finish your application.

The unique and compact ear-type clamping system developed by Hans Oetiker is a popular item. Its simple design provides a strong clamping system that never needs retightening. The Oetiker name, as well as the products it represents, is well known and respected throughout the world.

Stainless steel worm gear clamps are offered in many styles, including lined for use with soft tubing. They offer a simple screw tightening method of installation.

Many customers, however, do not want to use metal clamps for various reasons (weight, corrosion, conductivity), yet they still require a reliably strong and secure clamp. Kwik Clamp™ gives the advantages of an all-plastic design that cannot rust or corrode, will not vibrate loose, and can be reused. Kwik Clamp is the answer when a non-metallic installation is desired. ■

Plastic Barbed Fittings & Hose Nipples

- Precision molded in nylon-6, high density polyethylene, PVDF, polypropylene, glass-fiber reinforced nylon, or glass-fiber reinforced polypropylene
- Lightweight, compact, easy to install and disconnect
- High impact strength
- Excellent chemical resistance
- REACH and RoHS compliant
- Free of phthalates

Notes

NATURAL NYLON Series 500

- Formulated to resist physical stress and abrasion
- Material: nylon 6 compound, NSF-51 and NSF-61 listed; FDA-approved ingredients
- Free of animal derived ingredients and conflict minerals
- Maximum Operating Temperature**: 149°F
- Excellent mechanical properties and strength
- Limited styles in 1-1/4" and 1-1/2" sizes are available; call for details

BLACK POLYETHYLENE (PE) Series 501

- Formulated for chemical compatibility and high impact resistance at lower temperatures
- Material: bimodal polyethylene
- Free of animal derived ingredients, conflict minerals and BPA
- California Prop 65 compliant
- Minimum Temperature**: -103°F

NATURAL PVDF Series 507

- Formulated to resist creep and fatigue under mechanical stress and load
- Offers excellent resistance to abrasion and UV
- Excellent chemical resistance
- Material: semi-crystalline, low molecular weight, vinylidene fluoride polymer with FDA and USP Class VI approved ingredients
- Free of animal derived ingredients, conflict minerals and BPA
- California Prop 65 compliant
- Maximum Operating Temperature**: 239°F

NATURAL POLYPROPYLENE (NATURAL PP) Series 502

- Formulated for excellent chemical and solvent resistance
- Material: high impact polypropylene copolymer, FDA-approved ingredients
- Free of animal derived ingredients, conflict minerals and BPA
- California Prop 65 compliant
- Maximum Operating Temperature**: 220°F
- A robust barb and fitting design

BLACK POLYPROPYLENE (BLACK PP) Series 508

- Formulated for excellent chemical and solvent resistance
- Material: high impact polypropylene copolymer, FDA-approved ingredients
- Free of animal derived ingredients, conflict minerals and BPA
- California Prop 65 compliant
- Maximum Operating Temperature**: 220°F
- A robust barb and fitting design

See page 6 for other POLYPROPYLENE Thermobarb fittings in styles such as Y and 4-way connectors.

**Values listed are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

Recommended Clamps

- Oetiker® ear type clamps
- Kwik Clamp™ nylon double bond hose clamps
- Worm gear clamps

Plastic Barbed Fittings & Hose Nipples

Plastic Barbed Fittings & Hose Nipples

FDA-APPROVED POLYPROPYLENE (FDA PP) Series 509

- Excellent temperature and chemical resistance
- Material: polypropylene homopolymer, FDA approved ingredients
- Free of BPA
- California Prop 65 and EMEA 410 compliant
- Low profile ribs for easy assembly
- Lightweight
- Gamma sterilizable
- Widely used in industry and laboratories
- Maximum Operating Temperature**: 207°F

Note: Older style barbs, which differ from ribs, still exist in some inventory, depending on size.

**Values listed at left are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

509 1681	1/8
509 1716	3/16
509 1751	1/4
509 1786	3/8
509 1891	9/16

Barbed Tee

PART NO.	HOSE ID (IN.)
509 2031	1/8
509 2101	1/4
509 2171	7/16

*Limited stock availability; lead times and minimums may apply — call for details.

Part numbers on this page beginning with 509 are sold in increments of 10 pieces.

Other FDA-APPROVED POLYPROPYLENE Y FITTINGS

- Precision molded of FDA-approved polypropylene random copolymer
- Meets USP Class VI standards; compliant with FDA 21 CFR 177.1520
- Smooth interior for unrestricted, uniform flow
- No mold parting lines or flashing
- Longer, more tapered lead barb slides easily into tubing and provides a secure attachment and reduced leakage
- Sterilizable by gamma radiation
- Three popular sizes stocked
- REACH, RoHS and California Prop 65 compliant
- Free of phthalates, BPA, animal derived ingredients and conflict minerals
- Max. Operating Temp.**: 178°F
- Ideal for single-use/disposable tubing assemblies

PART NO.	SIZE (IN.)	PCS PER PACKAG E
502 7106	1/4	
502 7120	3/8	100
502 7148	1/2	50

Plastic Barbed Fittings & Hose Nipples

ACCESSORIES

502 2521

502 2556 & 502 2591

Pinch Clamp

- Chemical resistant
- Autoclavable
- One piece construction for easy operation; no sharp edges to damage tubing
- Free of animal derived ingredients and conflict minerals
- Accurate flow rate*
- Gamma stable†
- Free of BPA; California Prop 65 compliant††

PART NO. <i>POLYPROPYLENE</i>	PART NO. <i>POLYESTER</i>	TUBING OD (IN.)
502 2521		Fits up to 1/4
502 2556		Fits up to 1/2
	502 2591	Fits up to 3/4

*Applies to 502 2556 and 502 2591 only. 502 2521 does not offer an adjustable flow rate; open or closed only.

†Applies to 502 2521 and 502 2591 only. Discoloration may occur from exposure.

††Applies to 502 2521 and 502 2556 only.

Check Valve

- Prevents back flow of liquid when pressure is stopped
- Body made of polypropylene
- Internal gasket made of Dutral synthetic rubber
- Made from FDA approved ingredients
- Free of BPA and latex
- EMEA 410 compliant

PART NO.	TUBING ID (IN.)
509 2451	1/4 – 3/8
509 2465	7/16 – 5/8

Reinforced Nipples

- Made from glass fiber-reinforced nylon (yellow in color) or glass fiber-reinforced polypropylene (black in color)
- High impact strength yet much lighter in weight than metal
- Resistant to most hydrocarbons, solvents, mild acids, and agricultural chemicals
- Made to MIL-C-27487 dimensions; fully interchanged with other materials made to the same standard
- Electrically non-conductive

Glass Fiber Reinforced Nylon

Temperature Range**: -30°F to 200°F

Working Pressure**: 1/2" thru 1" 175 psi
1-1/4" thru 2" 150 psi

Glass Fiber Reinforced Polypropylene

Temperature Range**: 10°F to 180°F

Working Pressure**: 1/2" thru 1" 125 psi
1-1/4" thru 2" 100 psi

Hose Nipples – Hose x MNPT

**Values listed are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

All items on this page sold in increments of 10 pieces.

Brass Barbed Fittings

- Formed of forged and/or machined brass
- Tapered pipe threads are made to Dryseal USA specifications
- An industrial standard — use in all general purpose applications

Notes

- General purpose brass barbed fittings designed for maximum durability
- Working temperature**: -40°F to 180°F
- Working pressure**: 150 psi at 160°F with appropriate clamps

**Values listed are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

Recommended Clamps

- Oetiker® ear type clamps
- Kwik Clamp™ nylon double bond hose clamps
- Worm gear clamps

Plastic Cam Operated Couplings

NYLON (Glass Fiber Reinforced)

- High impact strength at much lighter weight than metal counterparts
- Corrosion resistant
- Will not easily cross thread or seize on mating threads
- Electrically non-conductive
- Resistant to most hydrocarbons, solvents, mild acids, and agricultural chemicals
- Made to MIL-C-27487 dimensions — fully interchangeable with other materials made to the same standards

POLYPROPYLENE (Glass Fiber Reinforced)

- Similar properties to nylon (above) yet more resistant to most acids than nylon couplings
- Made to MIL-C-27487 dimensions

Made in U.S.A.

Notes

NYLON

Material: Glass-fiber reinforced nylon — yellow in color

Standard Gasket:	EPDM
Handle:	304L Stainless Steel
Pin:	302 Stainless Steel
Temperature Range:	-30°F to 200°F**
Working Pressure**:	3/8" thru 1" 175 psi
	1-1/4" thru 2" 150 psi
	3" 100 psi
	4" 50 psi

POLYPROPYLENE (PP)

Material: Glass-fiber reinforced polypropylene — black in color

Standard Gasket:	EPDM
Handle:	304L Stainless Steel
Pin:	302 Stainless Steel
Temperature Range:	10°F to 180°F**
Working Pressure**:	1/2" thru 1" 125 psi
	1-1/4" thru 2" 100 psi
	3" 75 psi

CAM OPERATED COUPLINGS are available with BSPT (metric) threads through minimum order.

**Values listed are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

■ Note that sizes are listed first due to the two materials offered.

4	560 2821*	

On 3/8", 1/2" and 5/8" sizes, the coupler and adapter portion is made to the 3/4" standard, therefore these sizes will mate together.

On the 1-1/4" size, the coupler and adapter portion is made to the 1-1/2" standard, therefore these sizes will mate together.

*Limited stock availability; lead times and minimums may apply — call for details.

Ear Type Clamps

- Oetiker ear type clamps “breathe” and adapt to the expansion and contraction of hose affected by thermodynamics or aging — no need to retighten
- Clamps are lightweight and compact — important when bulky screw-type clamps interfere with limited-space applications
- Provides a tamper-proof seal without damage to the hose

One Ear

- Made of UNS S30400 (DIN 1.4301) stainless steel or SAE 1008/1010 (DIN 1.0338) zinc plated carbon steel
- Features a mechanical lock at the joint instead of a spot weld — prevents failure due to corrosion

Installation Notes

When installing OETIKER EAR TYPE CLAMPS, each ear must be crimped as recommended to obtain a proper seal. An incorrect installation may impair the connection. If a clamp ear can be closed all the way, the clamp size selected is probably too big, and the next smaller clamp should be used.

to Apply:

Position clamp on hose as shown.

Give each ear a firm squeeze with your Oetiker Standard Jaw Pincers.

Where access to ear is difficult, use Oetiker Side Jaw or Narrow Jaw Pincers.

to Remove:

Grip outer edge of ear firmly and cut through with either pincers.

Cut ear by taking several small bites at its base with either pincers. Then grip ear firmly and twist off.

Stepless clamps may be easily removed by prying end up with a common screwdriver.

PART NO. STAINLESS STEEL	PART NO. ZINC PLATED	NOM. OD (IN.)	INCHES OPEN-CLOSED

Notes

One Ear Special clamps are available through special order. These clamps feature a one-piece design made from spirally welded tubing to provide a strong grip with a smooth inner and outer band surfaces. The one-ear design allows for easy access. Call for details.

Because each application has its own set of variables, application pressures vary. Field testing should be performed to determine the actual maximum pressure for the application.

*Limited stock availability; lead times and minimums may apply — call for details.

All Oetiker clamps sold in increments of 100 pieces.

Ear Type Clamps

One Ear Stepless

- UNS S30400 (DIN 1.4301) stainless steel
- Patented design guarantees 360° seal preventing leaks on soft or thin walled hose or tubing
- One-ear design allows easy accessibility

All Oetiker clamps sold in increments of 100 pieces.

PINCERS

- Use for proper crimping of clamps
- Durable steel construction
- Three styles to select from

Standard Jaw Pincer

PART NO.

980 0182

3/4" jaw width

Narrow Jaw Pincer

PART NO.

980 1000

3/8" jaw width for tight areas

Side Jaw Pincer

PART NO.

980 0203

Dual-purpose design allows clamps to be applied or removed in confined areas with pincers held parallel to the hose. May also be used like Standard Jaw Pincers; 3/4" jaw width.

Nylon Double Bond Hose Clamps

- Made of durable, black nylon 6-6, a U.L. Recognized Component
- Will not rust or corrode
- Easy to install and remove with hose in place; reusable
- Handles temperatures from -40°F to 340°F**
- Handles most moderate non-hydraulic pressure applications
- Patented double row of teeth ensures a strong bond that will not vibrate loose
- RoHS compliant
- Heat and light stabilized

Notes

KWIK CLAMPS are typically stored and shipped with a small amount of water. This helps to maintain physical properties and prevents the clamps from drying and/or cracking prior to use. Water does not harm the product.

**Values listed are typical for the material used in manufacture, except where noted, and are meant only as a guide to aid in design. Field testing should be performed to find the actual values for your application. Clamps must be used in higher pressure applications; testing recommended.

*Limited stock availability; lead times and minimums may apply — call for details.

All part numbers up to and including 570 1304 sold in bags of 100 pieces. All others sold in bags of 50 pieces.

- Ideal®-Tridon® branded clamps
- All-steel construction for durability
- Miniature, marine grade, and lined types available
- Simple screw tightening method
- Wide range of uses

■ Note that sizes are listed first due to the variety of materials offered

All worm gear clamps sold in increments of 10 pieces.

Notes

SERIES 52M / 300 – Miniature

Band: 5/16" wide, 301 stainless steel ■
Housing: carbon steel, clear chromate dipped ■ Screw: combination 1/4" hex head slotted, 1018 carbon steel, clear chromate plated

SERIES 62M – Miniature, Automotive Grade

Band: 5/16" wide, 301 stainless steel ■
Housing: 301 stainless steel ■ Screw: combination 1/4" hex head slotted, 410 stainless steel

SERIES 611

Band: 1/2" wide, 201 stainless steel to 4" nom; 301 stainless steel 4-1/2" nom & above ■
Housing: 301 stainless steel ■ Screw: combination 5/16" hex head slotted, 1018 carbon steel, clear chromate plated

SERIES 620

Band: 1/2" wide, 301 stainless steel ■
Housing: 301 stainless steel ■ Screw: combination 5/16" hex head slotted, 305 stainless steel

SERIES 225 – Marine Grade

Band: 9/16" wide, 301 stainless steel ■
Housing: 301 stainless steel ■ Screw: combination 5/16" hex head slotted, 305 stainless steel

SERIES 613 – Lined Clamp for Soft Tubing

Lining prevents soft tubing, such as silicone, from extruding through band notches during clamp application ■
Band: 1/2" wide, 201 stainless steel ■ Lining: 301 stainless steel ■ Housing: 201 stainless steel ■
Screw: combination 5/16" hex head slotted, 1018 carbon steel, clear chromate plated

PVC A Wide Range of Styles

- Chemical and corrosion resistance with rubber-like flexibility
- Choose from various construction options: braid reinforced, unreinforced, rigid pipe, wire reinforced, push-on style, spiral reinforced
- NSF, antimicrobial and DEHP-free versions available
- Applications include general industrial, food, pharmaceutical and medical, protective coverings, insulation sleeving, equipment components, many more

Silicone Platinum or Peroxide Cured, Medical Grades

- Braid-Reinforced hose or unreinforced tubing
- Flexible, resilient, odorless
- Ingredients meet USP Class VI, FDA, and NSF-51 requirements
- Handles temperatures ranging from -100°F to 500°F
- Peroxide or platinum cured

Polyurethane Braid-Reinforced or Unreinforced

- Select from reinforced hose or ester or ether based unreinforced tubing
- Naturally flexible – no plasticizers to migrate out and cause flow contamination
- Resistant to weathering, moisture, chemicals, petroleum products
- Well-suited for applications involving repeated flexing, vibration, abrasion situations, radiation exposure, impact
